

ENZYMES

ABOUT US ▶

Infinita Biotech Pvt. Ltd., founded in 2015, is a leading Multidivisional Biotechnology Company in India. It is engaged in manufacturing, marketing and creating customised Enzyme based formulations, for various specialised industries. We manufacture Eco-friendly Enzymatic solutions for over 20+ industries.

Our Research and Development Center has been recognised by the Department of Scientific and Industrial Research, Ministry of Science and Technology, Government of India. Our Certifications and Accreditations include ISO 9001:2015, ISO 22000: 2018, Halal, FSSAI, Kosher, Oeko-Tex Eco Passport as well as ZED Gold. We are equipped with a High-End Individual Liquid and Powder Production facility with an Annual Capacity of 1200 tons, expandable up to 2 times. In a very short span of time, our Company has expanded its reach to more than 55 countries, covering all the major continents.

MISSION ►

To set the bar high as an Industry Leader in creating unique, Eco-friendly Enzymes based formulations for industrial applications. We are committed to provide High-Quality products with International standards to our esteemed customers, and prioritising Environmental concerns while carrying out our Business and Manufacturing activities.

VISION ►

To be the leading Biotechnology Company in the world in the field of Eco-friendly Enzyme -Based Formulations for Industrial Applications.

ECO PASSPORT

WHY CHOOSE US? ►

Our company comes with a technical expertise of over 35+ years in the field of industrial enzymes, and our leadership and extensive expertise in the domain of biotechnology has enabled us to grow with continued success. This can be attributed to our policy of providing innovative, effective and high-quality products and solutions to meet specific customer needs with continuous research and development.

Our desire for having a cutting-edge in this field is backed by -

- Best-In-Class R&D Laboratories And State-Of-The-Art Manufacturing Facility
- Deep Understanding Of Customer Needs And Requirements
- We Are Specialised In Providing Customised Enzymatic Solutions
- Committed To Innovation, Service And Performance
- Ability To Adapt And Customise Products For Best Outcomes
- Well-Qualified And Highly Motivated Personnel
- High-End Control Protocols.
- In-Process Quality Assurance Procedures
- Strong Marketing And Distribution Network
- Synergistic Relationship With Suppliers And Dealers

ABOUT ENZYMES ►

Enzymes are biological active proteins made by all living organisms. They are found everywhere in nature. They catalyse biochemical reactions in cells. In today's world, they are considered a preferred alternative to use of chemicals. Amongst other benefits, enzymes minimise energy consumption.

ENZYMES FOR INDUSTRIAL APPLICATIONS ▶

ENZYMATIC FORMULATIONS FOR INDUSTRIAL APPLICATIONS ►

BENEFITS OF OUR SOLUTIONS ►

Our products offer multiple benefits that cannot be obtained by traditional chemicals and processes. Our eco-friendly enzymatic solutions are sustainable by nature. They are superior quality and give lower production costs as well as less wastage. They help reduce energy consumption. We have developed enzymatic solutions for niche and unique areas. We innovate continuously and work incessantly towards offering more and better products, applications and solutions.

OUR WAY OF GIVING BACK TO EARTH ►

Our Sustainable Enzymatic Solutions for various industrial processes help industries to have stable production with increased efficiency and uncompromising quality. Our formulations act as an alternative solution for various chemicals. Enzymes after finishing their job break down into amino acids and get recycled naturally in the Environment to generate less waste. With changing situations, we try to develop alternatives for different applications; for instance we developed an Eco-friendly Disinfectant during the Covid-19 Pandemic; Enzymatic solutions for less focused areas like Crude Oil Spill Remediation, Biogas Production as well as Wastewater Treatment. We continuously strive forward to provide Sustainable Solutions for burning issues as well as novel and less focussed issues and do our bit for the Environment.

*Driving Innovation for
A Greener Tomorrow!*
